

Please read this information carefully before using me. Do not throw this instruction for use away, it contains important information.

CONTENT OF INSTRUCTIONS

1. USE ME FOR
2. HOW TO USE ME
3. BE CAREFUL WITH ME
4. MY INGREDIENTS
5. HOW TO STORE ME
6. MY CONTACT DETAILS

1. USE ME FOR

Hey you! I'm WILLY the anti-wart remover and together we are going to do this! The bottle contains an invisible, non-shiny, topical gel that effectively removes warts and verrucas. I contain monochloroacetic acid, a substance having a degrading action on the skin. The wart will dissolve, layer after layer. Monochloroacetic acid will make sure that the cells containing the wart virus disappear.

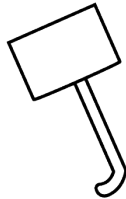

2. HOW TO USE ME

The child proof cap can be opened as follows: Place me on a solid underground that is able to resist the caustic fluid. Avoid contact with clothes, textile or table-cloths. You can open

the vial by pressing down from the cap turning it simultaneously. Remove the cap from my bottle.

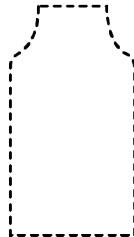

Use me only once per week. In order to prevent the skin surrounding the wart from being affected, I recommend protecting the skin surrounding the wart against the corrosive action of the fluid, prior to the treatment, for instance by means of Vaseline or zinc ointment.

First, thoroughly pat dry my spatula, e.g. by means of paper towels, and then return the spatula in my bottle so that a little bit of fluid attaches to it. In this way you will not apply too much fluid to the wart.

Then, apply a small amount of Kidsner Wart Treatment to the wart using the spatula (do not allow the fluid to drip).

Make sure that you only apply me to the wart. Allow it to dry for a moment. Cover the wart with a plaster. After a week, the wart will dissolve, layer after layer. My fluid will need a week to dissolve off the top layer of the skin, so you will not see an immediate result after application.

After some time the wart cells are destroyed and the wart will get a white colour and will be rejected.

You should not apply me more than once per week. Depending on the size and thickness of the wart, it may be necessary to repeat the treatment with me after one week. Warts are contagious. That is why we do not recommend using the product for more than one person.

Please apply me with utmost care. The solution is caustic. Be extra careful when applying it to bodyparts that are more difficult to reach. This particularly applies to persons with a limited mobility or in case of disturbed fine motor functions in the system (trembling hands, stiff fingers). Carefully close my bottle after use.

3. BE CAREFUL WITH ME

Do not use me:

- Under the age of 4 years old;
- For more than 30 days consecutively;
- If you are oversensitive to one or more of my ingredients;
- In the face (the fluid should never make contact with the eyes or the mucous membrane in the nose or mouth);
- For genital warts or in the genital area;
- On birthmarks, water warts, open wounds, moles, naevus, senile (brown) warts, darkly coloured, hairy or strange looking warts;
- On red, irritated or infected warts;
- Immediately after a surgical removal of warts, freezing of warts (cryotherapy) or a laser treatment. This particularly applies when the skin is red or painful after the treatment. In this case you will have to wait for at least 4 weeks, until the redness or inflammation of the skin has fully disappeared. Only then you can start using me;
- During pregnancy or while breastfeeding;
- Do not use me on warts which occur completely or partly underneath the nail.

Be extra careful when using me:

- In case of doubts concerning the diagnosis (the change in the skin cannot be clearly explained as a wart);
 - In case of immune deficiency (e.g. when you are using cytostatic medication);
 - In case of diabetes, or other complaints such as vascular diseases, as a result of which wounds will heal less easily.
- In these cases, you may not use me before a doctor has been consulted.

Warnings:

- Only intended for external use;
- Apply me only to warts on hands and feet;
- Use me with utmost care. My fluid is corrosive;
- If the healthy skin makes contact with me, please rinse it with water. If, in spite of these precautions, the skin becomes irritated, it will have to undergo the same treatment as burns;
- Contact your general practitioner, if your complaints continue to exist;
- Properly close the bottle after use and store

it in an upright position;

- Keep out of reach of young children;
- Don't use me without your mom there;
- Avoid contact with clothes, textile, tablecloths or skin;
- The treatment of warts located next to nails may be painful, as the fluid can be absorbed under the nail and may cause irritation of the sensitive skin;
- Stop using if blisters occur.

Side Effects

I may cause some side effects, although not everyone will experience these side effects. The side effects that could occur when using me are: irritated skin, burning sensation, skin redness or oversensitivity reactions. If any of these side effects becomes serious, or if you notice any side effects not listed in my instructions for use, please consult your doctor or pharmacist.

Interference with medications

There is no known negative effect between me and other medications.

4. MY INGREDIENTS

Monochloroacetic acid, purified water.

5. HOW TO STORE ME

Store me at a temperature of 15-25°C in a dry and dark place in the original container. My expiry date is stated on the bottom of the packaging. I can be kept for 1 month after opening.

6. MY CONTACT DETAILS

All enquiries about me should be sent to the distributor. For more information about me, please visit www.kidsner.com.

I'm a medical device, read my instructions for use before use.
